

The number of the set nets in the coast of Japan by sub-areas and years in the period
1979-2006

Takashi Hakamada

The Institute of Cetacean Research, 4-5 Toyomi-cho, Chuo-ku, Tokyo 104-0055

This paper provides the number of the 'large' and 'salmon' set net by sub-area and year in the period 1979 – 2006 when the number of incidental catches in the coast of Japan was reported. This paper responds to one of the tasks from the Preparatory Meeting to co-ordinate the extraction/development of time series of set net effort by sub-area, month and year for Japan.

Table 1. The number of 'large' set net in the coast of Japan by sub-area and year during 1979-2006.

	1979	1980	1981	1982	1983	1984	1985	1986	1987	1988	1989	1990	1991	1992
